Subject: Microsoft got off easy....

I don't want to use windows. Ever.

The way things are looking, I'll have no choice in a matter of a few years.

They MUST be stopped. They have bigger plans, and it will be too late if we wait any longer.

A couple of examples (I don't have the time to go into detail):

They are in the process of killing the mp3 format.
They are trying to kill JAVA, buy replacing it with their C# (or .NET strategy), which is a stolen and jumbled JAVA.

These will be their next two targets. Just watch.

Anyway, know my friends and I are disgusted with microsoft's abuse of power, and lack of taste and compassion in an otherwise very fertile industry.
